---

## Profile

I am an experienced Software Engineer with 5+ years' track record in utilizing current technology trends to develop cutting-edge web applications. I am committed to delivering high-quality results and tackling intricate challenges.

---

## Education

Bachelors in Computer Science (BSCS)  
DHA Suffa University

AUG 2016 - JUN 2020  
CGPA: 3.66/4.00

---

## Skills

### Programming Skills

- |               |                |
|---------------|----------------|
| • JavaScript  | • HTML/CSS/JSX |
| • C#/.Net     | • Java         |
| • MySQL/NoSQL |                |

### Frameworks and Libraries

- |               |                |
|---------------|----------------|
| • React JS    | • Redux        |
| • Material UI | • Ant-design   |
| • Context     | • Rest APIs    |
| • Bootstrap   | • React Router |

---

## Certifications

- IBM Full Stack Software Developer Specialization  
<https://www.coursera.org/account/accomplishments/specialization/certificate/WNPX4QFRBBEY>
-

## Work Experience

**Senior Software Engineer**  
E-Tools Software PTY LTD.

**AUG 2020 – Jan 2023**  
Pakistan

- Software Development including the development of new features.
- Enhancements and fixes to existing features.
- Software testing - reviewing requirements and development of test cases with execution.
- Reporting the status of the task completed as requested.

**Software Engineer**  
Zenveus

**AUG 2019 – AUG 2020**  
Pakistan

- Implemented coding methods, tested and evaluated in React JS
- Collaborated on Admin Panel front-end
- Worked on Manager Side, where the manager can add users, define vendors, sponsor products, add markup for vendor listing on the website, etc.
- Worked on Vendor Side, where the vendor can perform CRUD operations on their products, set discounts for a specific time, and is able to see the views and most added products in the wish list, etc.

**Software Engineer**  
Sudoware

**JAN 2018 – JAN 2019**  
Pakistan

- Designed, evaluated, tested, and implemented coding methods in particular programming languages to build complex, improved, and functional programs
- Developed features for different applications
- Prompt in finding and fixing bugs and errors
- Built applications in Android SDK, Google Maps SDK and Mapbox
- Maintenance of previously developed software

---

## Projects

**OffernCode**

<https://www.offerncode.com/>

**Tech Stack:** React JS, Redux, Material UI, Next JS, Node JS, AWS

**Description:** Built reusable components for coupons and codes, using material UI for interactive UI, and integrated rest APIs

**Contract Master (Website and Contractor/Supplier Panel)**

<https://www.thecontractmaster.com/>

**Tech Stack:** React JS, Redux, React Bootstrap, Node JS, AWS

**Description:** Build reusable components for Contracts and Agreements. Build interactive UI components using React strap. Build a Message Panel for connecting to Contract/Supplier.

## NeRA (National Electronic Residential Agreement) (SAAS)

### On-Prem Services

**Tech Stack:** React JS, Context API, Reactstrap, .Net, AWS

**Description:** Created components for Agreements and Residents. Users can download the agreements and upload custom templates. Created a Board like JIRA for changing the resident's status. It has reports generated for different facilities.

## E-Gateway (SAAS)

### On-Prem Services

**Tech Stack:** React JS, Context API, Reactstrap, .Net, AWS

**Description:** It's the main gateway to connect applications like NeRA, ERAD, ESA, etc. This contains User permissions and accessibility options.

## ERAD (E-Tools Refundable Accommodation Deposit) (SAAS)

### On-Prem Services

**Tech Stack:** React JS, Context API, Reactstrap, .Net, AWS

**Description:** It contains complex calculations for payments and refunds. It has reports generated for different facilities. It also contains the Admin settings sections for handling some of the settings throughout the application.

## ESA (E-Tools Supplier Agreement) (SAAS)

### On-Prem Services

**Tech Stack:** React JS, Context API, Reactstrap, .Net, AWS

**Description:** It contains the functionality for managing the supplier agreement. It has built-in reusable components. Users can create suppliers and finalize their agreements in the form of documents. It has reports generated for different facilities.

## AAA Booking (Travel Website)

### Under Development

**Tech Stack:** React JS, Redux, Ant Design, Node JS, AWS

**Description:** A user can book hotels in Saudi Arabia for their stay with other commodities.

## AAA Booking (Travel Website Panel)

### Under Development

**Tech Stack:** React JS, Redux, Material UI, Node JS, AWS

**Description:** Hotel and Booking Management
